

## POLICE COURT NOTES.

Morrow and Underwood Sentenced to Do Time in Oahu Jail.

Principal Defendant Says Pat Curtis Stood Him Off With an Axe. An Appeal Noted.

In the case of Puia, Ullana and Kahalewai, for failing to present themselves for examination as required by law of women of their character, defendants plead guilty in Police Court yesterday morning and were sentenced each to thirty days at hard labor.

In the case of W. P. Morrow, Judge Wilcox noted that there were two charges against the defendant, viz., carrying a deadly weapon and assault with intent to murder.

The motion of the prosecution to be allowed to enter a nolle prosequi in both of the charges was granted.

Morrow entered a plea of not guilty to the second charge.

The case of F. Underwood, for being an accessory, having in it the same facts, it was agreed that defendant be tried together with Morrow.

Morrow confessed that he had drawn a revolver on Pat Curtis on July 5th. He had asked for police protection and had been told that he would have to get a warrant. Curtis had stood him off with an axe two days previous. He pointed the revolver at this man and told him to leave, as he considered he was the owner of the Spray. Had no intention of shooting Curtis.

Both defendants were found guilty by Judge Wilcox. Morrow was sentenced to three months at hard labor and to pay a fine of \$50, and Underwood to one month's imprisonment at hard labor and to pay a fine of \$20.

## WHARF AND WAVE.

The British bark Koculus, Rodd master, arrived in port yesterday morning, 56 days from Newcastle, with a cargo of coal. She experienced very rough weather on the trip, which resulted in damage to her bulkhead and sides.

The British steamship Asloun, Murray master, arrived early yesterday morning, 15 days from Portland, Ore., with a cargo of general merchandise for this port. After leaving Portland she called at Victoria and made the trip from there in a little over ten days. The Asloun will sail for China and Japan today.

The British bark Belmont, Ladd master, arrived yesterday morning, 48 days from Sydney, Australia, with 806 tons of coal. She is consigned to Wm. G. Irwin & Co., and will load sugar for New York. Following is the captain's report: Left Sydney May 27th, experiencing NE to SE winds to New Zealand, which was passed on the north. In lat. 21 S and long. 164 W, came across a hurricane which lasted eight hours; passed Tahiti June 26th, and then had NNE winds; crossed equator July 5, from 147 W had strong NE trades to port.

## WRECKINGS AS A SCIENCE.

## A Project to Establish a Plant at San Francisco.

Henry T. Scott, President of the Union Iron Works, is seriously considering the organization of a great corporation to go into the ship-wrecking business on the Pacific Coast, says the S. F. Call.

"It would unquestionably be a big thing," said Mr. Scott in discussing the subject. "We would find ample work to do, when you consider that we could operate from one end of the coast to the other. At present there are no really effective appliances here for scientific wrecking, and the first thing we should do would be to provide ourselves with a complete and modern plant. My idea is that all of the more important shipping and shipbuilding firms should go in as the principal stockholders, on an even-share basis, and then employ a professional wrecker as manager and a competent and experienced crew. I would suggest, off-hand, that the corporation should comprise J. D. Spreckels & Co., Goodall, Perkins & Co., the Pacific Mail Steamship Company, Union Iron Works, the Merchants' and Shipowners' Towboat Company and several more interests of that character. I believe it will be done, and if it is I know it will be successful. It is something that is needed on this Coast."

## The "Sailor's Friend."

Samuel Pillsoll, known throughout the British Empire as the "Sailor's Friend," has recently arrived in America. Mr. Pillsoll has scanty white hair and a white beard, and is nearly blind. He has twice been a Liberal member of Parliament, and after long agitation succeeded in having laws enacted compelling ships to be so marked as to prevent their overloading, and also to avoid defective equipment of craft leaving port. Mr. Pillsoll has also promoted the improvement of accommodations for cattle on steamships plying between Canada and England.

## From the Bottom of the Sea.

The Norwegian bark Elsa Anderson has arrived in London with a strange derelict in tow, says an exchange. This was an English-built brig, which had, judging by the rig, been at the bottom of the sea since early in the century. When off the Faroe Islands there was an upheaval of the ocean which nearly swamped the Elsa, and soon afterwards, about a mile away, was seen a strange, uncanny-looking craft. The Elsa Anderson approached and ultimately took her in tow. The vessel, which had been so curiously brought to the surface by the submarine disturbance, was covered with a myriad of sea-shells, and resembled one of those miniature vessels overlaid with shellwork often seen at seaside places. The brig was boarded and found to contain very little water in the hold. In the captain's berth were several iron-bound chests, the contents of which had been reduced to pulp, except a leather bag, so hardened as to require an axe to open it. Inside guineas, bearing the date of 1809, to the value of \$5,000, were found. There was also discovered several watches and pearls, rendered valueless by the action of the water, and about the neck of one of the skeletons found was a gold chain, attached to which was a silver crucifix and rosary.
